Mr. Kreisler again gave his hearers enty of pleasure. His performance the first movement of the Brahms concerto seemed unaccountably dull till he came to the cadenza, which was exciting, but in the slow movement and the finale he was more like himself. But we have heard him pour out the message of this characteristic composition with more convincing eloquence. His in-terpretation yesterday would have made the fame of a minor violinist, but it was not quite Kreisler.

assistance to the public school pupils. He said there was a tendency to bring closer the relations between the museum and the schools, but a number of obstacles existed to the establishment of ideal relations in which the museum could throw open its doors to the public school pupils.

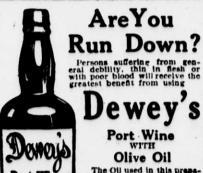

But there are relations between the museum and the schools, beginning in a small way, yet progressing as well as can be expected. The museum has appointed an instructor who is to give assistance to the public school pupils as well as to others. A classroom is set aside for the art students from the public schools and in the new extension there are to be two rooms for class work.

Beautiful Workmanship Seen in Collection Just Arrived.

The collection of jades on view at galleries of Frank Partridge, 741 Fifth avenue, gives one an excellent opportunity o study this wonderful product of th East. Nothing more subtle in art can be imagined than the qualities embodied in a Chinese jade. The design surmounts the traditions (which in China are enormous) and is free, the colors speak preciousness even to the ignorant and the delicacy of the cutting is beyond our Western comprepension. Like Lafcadio Hearn, we can understand enough of it to see that we understand nothing.

These present pieces are in several cool gray greens, some are of lapus lazuli and

gray greens, some are of lapus lazuli and some in varying tones of white. These whites are technically called by the Chinese mutton fat and pork fat. They are thought descriptive, the pork fat being the most brilliant white. However, be that as it may these colors seem to be the very last word in the way of refinement.

One of these pieces, a vase and cover 10 inches high, in pure white mutton fat Jade, the cover being connected with the vase by a link chain, 9 inches long, is made from one piece. That is, the cover, claborate vase and linked chain are carved from one solid piece of jade. The design is redolent of the East. The sides of the vase are carved with chrysanthemums conventionalized after the manner that the modern French have recently adopted and the top is surmounted with two Ho-Ho birds.

These jades (there are twenty in allicome from the collection of Prince Tuang, uncle to the young Emperor recently deposed. her daughter, Miss Margaret Trevor,
